-Dr. Jay LaGuardia - CEO of TriplePLife

Amanda led a two hour workshop for our small but growing business in which she helped each team member discover their deepest values. Then each team member explored how their values aligned with our company's values, as well as with the work each person was doing for the company.

The result was an amazing jolt to our team's cohesion and to each team members' dedication to advancing the company's mission. It also resulted in a significant adjustment to one team member's role. The benefits have continued in the months since the workshop.

Amanda lives and breathes what she teaches and it shows. We recommend her highly to any business wanting to get clarity about its values and mission, increase team cohesion, and enroll team members in its mission, with all the attendant benefits in productivity and service.
